REMARKS

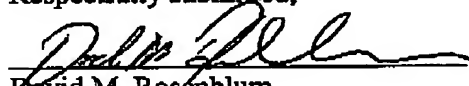

This is in response to a restriction requirement.

Applicant elects the claims in Group I, namely, claims 1-10 drawn to the apparatus of the present invention. Group II are drawn to the method and are covered by claims 11-15.

Applicant traverses this requirement as understood given the fact that the method would be carried out by an apparatus of the invention and as such would not impose an undue burden on the office with respect to any further searching.

Prompt and favorable action is hereby solicited.

Respectfully submitted,
